DETAILED ACTION

1. This is the first action on the merits. Claims 1-30 are pending.

Information Disclosure Statement

1. The IDS filed 7/25/01 has been considered in full.

Drawings

2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 states that the filter is a pump. The Examiner is uncertain how this is accomplished. It appears that the oil should flow through the gearbox, the filter, the oil being driven by a pump.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 21-30, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Reinosa ('231).

Reinosa shows a gearbox (12 – here in the form of an internal combustion engine), oil (10) contained within the gearbox (10), a fluid conduit (32a) connected to an outlet (14) of the gearbox, the fluid being pulled from the gearbox by a pump (18), the outlet of the pump having a conduit (32b, 34, 32c) which is connected to a fine filter (38) capable of trapping contaminants of the order Applicant is claiming.

Allowable Subject Matter

7. Claims 1-20 are allowable.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fishgal ('406 and '923) show contamination related systems for oil used during operation.

Clark, II ('666) shows a transmission flush system.
